Re: Request for a thematic hearing on “Suppression of Indigenous Resistance to Extractive Industries in North America” (United States, Canada & Mexico) during 172nd Period of Sessions

Dear Executive Secretary Abrão:

The Water Protector Legal Collective and the Indigenous Peoples Law and Policy Program, along with 61 co-sponsoring organizations and Indigenous governing institutions, submit this request for a thematic hearing to highlight the presence of a trend of suppression and repression of Indigenous resistance to extractive industries and the criminalization of Indigenous human rights defenders throughout the region.

A hearing would bring much needed international attention to the urgent situations escalating as governments and extractive industry corporations continue to attempt to suppress Indigenous resistance to pipelines, power plants, fracking and mining in the United States, Canada and Mexico, as well as Indigenous resistance to the U.S.-Mexico border wall, construction of which is tied to fossil fuel interests. The hearing would also provide an opportunity to update the Commission on the status of Indigenous human rights defenders criminalized for resisting the Dakota Access pipeline.

The purpose of the hearing would be to examine the militarized response, criminalization and use of wrongful arrests, abusive conditions of confinement, and excessive force against water and land protectors resisting pipeline, mining and other extractive industry projects, and to encourage U.S., Canadian and Mexican national and local agencies to protect the security of Indigenous human rights defenders and ensure their rights to free expression and assembly in accordance with their obligations under the American Declaration on the Rights and Duties of Man and American Declaration on the Rights of Indigenous Peoples. The Commission would hear directly from the human rights defenders arrested and injured by law enforcement to bring greater worldwide public attention to the abuses perpetrated by governments and extractive industries.

The information presented will follow-up on Commission hearings that have taken place on similar issues in the past few years and that remain unsettled (Situation of Environmental Rights Defenders in the Americas, National Protection System for Defenders and Justice Operators in the Americas, Situation of Defenders of Women’s Rights and the Environment in America, Human Rights Situation of Defenders of the Environment in the Context of Extractive Industries in America, Improper Use of Criminal Law to Criminalize Human Rights Defenders, and the Situation of Human Rights Defenders in the Americas). The nature of the hearing aligns with the important work of the Commission in recent years, specifically

We would call upon the Commission to urge the United States to implement existing recommendations set out in the IACHR and UN reports highlighted and bring further international attention and pressure on the U.S., Canada and Mexico with the hopes of opening up avenues of redress and conciliation that have not previously been made available to the affected Indigenous peoples.

Please do not hesitate to contact us if you require further information. We thank the Commission in advance for its consideration of this request.

Sincerely,

Water Protector Legal Collective
